ABOUT

B.Tech graduate in IT with a strong passion for web development, problem-solving, and building efficient, user-friendly applications. Skilled in creating responsive, interactive web interfaces and continuously improving technical skills through real-world projects.

SKILLS

Languages	JavaScript, TypeScript, C, C++, Python
Frontend	React.js, Tailwind CSS, Bootstrap, HTML, CSS
Databases / Backend	Firebase, MySQL, MongoDB

WORK EXPERIENCE

DY365 (Media House), Guwahati – Assignment Department – Executive Current

- Maintaining daily assignment records and data logs for news operations.
- Coordinating with reporters, editors, and internal teams to track assignment status.
- Preparing basic reports and documentation using Excel and digital tools.
- Ensuring timely updates, data accuracy, and proper record maintenance.

APDCL, Guwahati - Intern June 2023 - July 2023

- Developed and deployed a web-based data acquisition system for real-time substation monitoring.
- Implemented MySQL-driven data management and automated reporting for accurate operational metrics.

Tech Booster - Intern July 2022

- Participated in Python programming training, learning data handling and processing techniques.
- Gained exposure to technical documentation and code best practices for projects.

PROJECTS

Career Guide App Nov 2025 - Dec 2025

Web platform guiding students on careers and colleges. Built with React, TypeScript, Tailwind CSS, and Firebase. Includes aptitude-based recommendations, top college listings, and user-friendly dashboards.

Supermall Management System Oct 2025 - Nov 2025

React & Firebase-based mall app enabling product browsing, category filters, and real-time offers. Admin and user dashboards implemented for efficient shop and product management.

Expense Tracker Sept 2025

Personal finance tracker built with React.js and local storage. Allows users to record expenses, visualize spending trends, and maintain financial discipline through category-based tracking.

Weather App Aug 2025

Displays live weather using the OpenWeatherMap API. Developed with React and TypeScript for a responsive, minimal, and real-time weather visualization experience.

SmartPredict - Smartphone Addiction Estimator Jan 2025 - May 2025

React.js frontend developed for research on smartphone addiction. Features interactive questionnaires to calculate real-time addiction scores and generate recommendations based on socio-demographic data.
